

AN EXPLORATION OF PERFORMANCE IN MATHEMATICS SUBJECT IN ORDINARY LEVEL SCHOOLS AT KINONDONI DISTRICT IN DAR ES SALAAM

DIDAS E. MICHAEL UB004/0267/12: BSC MATH and STATISTICS

January 15, 2015

Abstract

Your abstract.

1 AIMS AND OBJECTIVES

To assess if the performance of pupils in mathematics subject is poor or good.

To assess if pupils like mathematics or not

To assess if there is enough material for teaching Mathematics

2 SIGNIFICANCE OF THIS RESEARCH

The significance of this research is to explore the difficulties in studying Mathematics among the pupils of ordinary level, also to provide the solution for the existing problem and suggesting the method that will help students to increase their performance.

3 OUTCOME OF THE RESEARCH

The outcome of this research will bring the detail about the performance of pupils in mathematics. It will show if it is good or poor. Also this outcome will help to generalize the new methods on how pupils can increase their performance if it is poor.

4 METHODOLOGY

In this research I will expect to use two methods (research tools) and that is questionnaire and observation. And the reasons of choosing this method are that they can be applied in large sample, and they do not consume time and they are not expensive.

5 RESOURCES

In my research the main resources needed is capital, this is for:- • Printing of questionnaire.

- Meals and transportation.
 - Stationary.
 - Equipment related to research like laptop,notebook etc
- Also Enough Time for conducting the research.
