## Candidate's Declaration

I hereby declare that the work presented in the thesis entitled “**Thesis title**” in partial fulfillment of the requirements for the award of the Degree of **Doctor of Philosophy** and submitted in the Department of Electronics and Communication Engineering of the National Institute of Technology Kurukshetra is an authentic record of my own work carried out during a period from ..... to ..... under the supervision of **Prof. XYZ**, Department of Electronics and Communication Engineering, National Institute of Technology Kurukshetra.

The matter presented in this thesis has not been submitted by me for the award of any other degree of this or any other Institute/University.

(Name of candidate)

(Reg. no. 0000000)

This is to certify that the above statement made by the candidate is true to the best of our knowledge and belief.

Place: Kurukshetra

Date:

(XYZ)  
Professor, ECE Department  
NIT Kurukshetra

*Dedicated to my family*

# ACKNOWLEDGMENTS

---

It is a great pleasure for me to express my respect and deep sense of gratitude to my Ph.D. supervisor [Professor name](#), Professor, Department of Electronics & Communication Engineering, National Institute of Technology, Kurukshetra, for his wisdom, vision, expertise, guidance, enthusiastic involvement and persistent encouragement during the planning and development of this research work. I also gratefully acknowledge his painstaking efforts in thoroughly going through and improving the manuscripts without which this work could not have been completed.

I am highly obliged to [Director name](#), Director, National Institute of Technology, Kurukshetra and [HOD name](#), Head of the Department, ECE for providing all the facilities, help and encouragement for carrying out the research work.

I am obliged to my parents [Father name](#) and [Mother name](#) for their moral support, love, encouragement and blessings to complete this task. I am especially thankful to my wife [Wife name](#) for her patience, love and encouragement during this journey.

I wish to express my appreciation to my friends [Friend name](#) and [Friend name](#) and grateful thanks to research fellows at department for their help and motivation throughout my research work. I also would like to express my deep and sincerely thanks to my friends and all other persons whose names do not appear here, for helping me either directly or indirectly in all even and odd times.

I am also thankful to the anonymous reviewers of my research publications. Their comments and suggestions were very helpful in shaping my research work. I would also like to thank DRC members for their constructive suggestions, support and encouragement.

I would also like to extend my special thanks to [XYZ](#) and other staff members of computer center in ECE Department, for their timely help and cooperation extended throughout the course of investigation.

Finally, I am indebted and grateful to the Almighty for helping me in this endeavor.

**(Name of candidate)**

# Chapter 1

## Introduction

---

*This Chapter provides a brief description of .....*  
.....

### 1.1 Background

Type introduction part here. [1]

### 1.2 Motivation for the present research work

Type motivation here.

### 1.3 Problem statement

Type Problem statement here.

Figure 1.1: abcdefgh

## 1.4 Organization of the thesis

The research work presented in the thesis is organized and structured in the form of seven chapters, which are briefly described as follows:

- i) **Chapter 1** describes the .....
- ii) **Chapter 2** provides a comprehensive review of .....
- iii) **Chapter 3** presents a .....
- iv) **Chapter 5** deals with .....
- v) **Chapter 6** presents a .....
- vi) **Chapter 7** concludes the thesis with overall discoveries of the present research work. The scope for future work is also mentioned.

# Chapter 2

## Literature review

---

*This Chapter presents a survey of most commonly used .....*

### 2.1 abcs

Noise is a random variation of brightness in digital images that often occurs due to imperfections in imaging devices and ..... [1]

$$v(i) = u(i) + \eta(i) \tag{2.1.1}$$

#### 2.1.1 xyz

**Figure 2.1:** Image

# Chapter 3

## Adaptive algorithm

---

*The choice of smoothing parameter .....*

### 3.1 Background

To preserve the inherent [2] .....

### 3.2 Proposed algorithm

An image contains .....

### 3.3 Experimental results

This section presents quantitative and qualitative results of the proposed algorithm .....

**Table 3.1: XYZ**

<b>SSSS</b>	<b>PPP</b>					<b>BBB</b>				
<b>PPPB</b>	$3 \times 3$	$5 \times 5$	$7 \times 7$	$9 \times 9$	$11 \times 11$	$3 \times 3$	$5 \times 5$	$7 \times 7$	$9 \times 9$	$11 \times 11$

### 3.4 Summary

The selection of .....

# Chapter 4

## Adaptive algorithms

---

*In addition to the issue of .....*

### **4.1 Introduction**

NLM algorithm [2].....

### **4.2 Experimental results**

In this section, the performances of the proposed algorithms .....

#### **4.2.1 Choice of parameters in the proposed methods**

Several authors .....

### **4.3 Summary**

In this chapter, some new approaches.....

# Chapter 5

## Wavelet-based denoising algorithms

---

*The shape of a local window* .....

### 5.1 Introduction

Wavelet-based image [3].....

### 5.2 Proposed approach

The shape of the local window

### 5.3 Experimental results

In this section, the performance of anisotropic shaped region .....

#### 5.3.1 Choice of parameters in the proposed approach

For all experiments, the size of region and subregion

### 5.4 Summary

In this chapter, a statistical approach .....

# Chapter 6

## Adaptive hybrid algorithms

---

*This Chapter explores the possibility .....*

### **6.1 Introduction**

Generally, non-local methods.....

### **6.2 Experimental results**

The performance of the proposed approaches

### **6.3 Summary**

This chapter presents a simple a.....

# Chapter 7

## Conclusions and future directions

---

*The research work presented .....*

### 7.1 Conclusions

The research work embodied in this thesis has addressed the problem of ..... various aspects of the research problem are investigated and the main findings are summarized below.

### 7.2 Scope for future study

There are many issues in .....

- The present research work can be extended to .....
- Images may be affected by multiple degradations .....
- Some new features .....
- The proposed approaches .....
