Índice Temático

1	Introducción	4
1.1	Subtema 1 de la introducción	4
1.1.1	Subtema 1 del Subtema 2 de la introducción	4
1.2	Subtema intermedio	4
1.3	Subtema 2 de la introducción	4
2	Objetivos	5
2.1	Objetivo General	5
2.2	Objetivos Especificos	5
3	Marco Teórico	6
3.1	Figuras	6
3.2	Ecuaciones	8
3.3	Tablas	9
4	Citas citables	9

Índice de Figuras

1	Esta es una figura alineada a la derecha.	6
2	Esta es una figura de Protoman alineada a la izquierda.	6
3	Esta es una figura centrada.	6
4	La fusión de tres imagenes dentro de un solo ambiente de figura.	7
5	Evolución a X	7

List of Tables

1	Esta es una tabla genérica.	9
---	-------------------------------------	---

1 Introducción

1.1 Subtema 1 de la introducción

1.1.1 Subtema 1 del Subtema 2 de la introducción

1.2 Subtema intermedio

1.3 Subtema 2 de la introducción

Recuerda que es preferible que la numeración llegue hasta un tercer dígito. Por ejemplo: 3.5.1. Así, un índice de subtema 1.1.1.1 es preferible evitarlo.

Recuerda que cuatro dígitos separados por puntos, es para las direcciones IP, no para tu tesis. Si aún así, usted necesita un apartado más puede hacerlo utilizando una notación como la que sigue:

Def. Derivada

Texto que corresponde a la sección que no debería existir.

2 Objetivos

2.1 Objetivo General

2.2 Objetivos Especificos

Son un conjunto de pasos que sirven de metas para lograr el objetivo general. Si deseas usar una lista numerada, podría verse así

1. Primer paso
2. Segundo paso
3. Tercer paso
 - (a) Paso del paso
 - (b) El otro paso del paso

Si por algún motivo desea hacer una lista no numerada, puede verse como sigue:

- Primer paso
- Segundo paso
- Tercer paso
 - Un subpaso
 - Otro subpaso

3 Marco Teórico

3.1 Figuras

Aquí tenemos un Megaman, como se aprecia en la Figura 1. Pero también podemos ver un Protoman en la Figura 2 y para completar la triada tenemos un Zero en la Figura 3.

Figura 1: Esta es una figura alineada a la derecha.

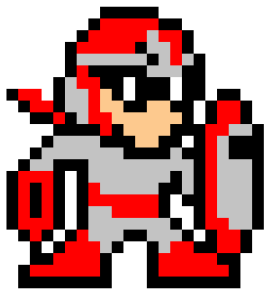

Figura 2: Esta es una figura de Protoman alineada a la izquierda.

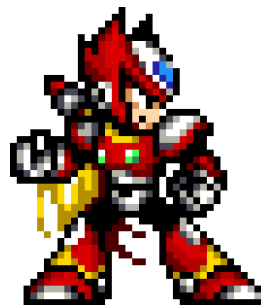

Figura 3: Esta es una figura centrada.

interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Etiam lobortis facilisis sem. Nullam nec mi et neque pharetra sollicitudin. Praesent imperdiet mi nec ante. Donec ullamcorper, felis non sodales commodo, lectus velit ultrices augue, a dignissim nibh lectus placerat pede. Vivamus nunc nunc, molestie ut, ultricies vel, semper in, velit. Ut porttitor. Praesent in sapien. Lorem ipsum dolor sit amet, consectetur adipiscing elit. Duis fringilla tristique neque. Sed interdum libero ut metus. Pellentesque placerat. Nam rutrum augue a leo. Morbi sed elit sit amet ante lobortis sollicitudin. Praesent blandit blandit mauris. Praesent lectus tellus, aliquet aliquam, luctus a, egestas a, turpis. Mauris lacinia lorem sit amet ipsum. Nunc quis urna dictum turpis accumsan semper.

3.2 Ecuaciones

Para presentar ecuaciones se utiliza el entorno *equation*.

Para presentar una ecuación numerada, se usa el entorno tal cual

$$16x^2 + 3x - 12 = 0 \tag{3.1}$$

Para referenciar lo que pasa en una ecuación, utilizamos su etiqueta (label) y usamos el formato que sea preferido por el autor. Por ejemplo, podrías decir que la ec. (3.1) se resuelve con la famosa chicharronera.

Si deseamos presentar una ecuación que ignore la numeración del documento, se usa el entorno **equation***

$$\hat{A}x = \vec{b}$$

pero en este caso, la etiqueta ya no tiene sentido. Por ejemplo, la ecuación anterior es la 3.2. Lo cual es claramente falso.

$$\forall \varepsilon \geq 0 \quad \exists \quad \delta \geq 0 \quad |x - a| \leq \varepsilon \Rightarrow |f(x) - L| \leq \delta \tag{3.2}$$

3.3 Tablas

Claro que es posible hacer referencia a una tabla dentro del texto. Se usa el mismo proceso que para todo lo demás, usando el apuntador *ref* hacia la etiqueta adecuada. Por ejemplo, podríamos señalar algún resultado ligado con la tabla 1.

Tabla 1: Esta es una tabla genérica.

T1	T2	T3	T4	T5
a	b	c	d	e
1	2	3	4	5
α	β	γ	δ	ϵ

4 Citas citables

Luego [1] se hizo famoso con la película de Oppie.

y con todo lo anterior conseguir hacer levitar una rana como en [2]. Pero también hay una definición matemática del amor en [3].
