Status Report

SINTE_EX

CLIENT(S) SINTEF's L ^A T _E X users	CLIENT'S REFERENCE B0U771M3				
SINTEF UNIT SINTEF Digital	DATE 2026-06-03				
PROJECT NUMBER SINTE _E X	STATUS AS OF DATE 10th March 2021				
CLASSIFICATION Unrestricted					
EXPENDITURE	NUMBER OF HOURS ELAPSED	STATUS	AS PLANNED YES / NO		
Last period	1 NOK	Last period	5	1. Academic objectives	Yes
Total	2 NOK	Total	6	2. Schedule	Yes
Of which wages	3 NOK			3. Expenditure	Yes
Planned expenditure	4 NOK			If not, explain in an attachment	

PROJECT MANAGER Federico Zenith	SIGNATURE
---	------------------

1 Minimum example

```
\documentclass{sintefstatus}
\begin{document}
\frontmatter % Sets up the first page
Hello world!
\end{document}
```

2 Progress in the last period

This new L^AT_EX class for SINTEF status reports was produced. Most commands to set the fields in the start page will be shown in the PDF when compiling the document without them, so just compile and read if you are not sure.

3 Deviations from the plan

The only non-self-explaining commands are those for the budget plots. In order to set the data, you need to use the `\plannedexpenditures` and `\accumulatedexpenditures` commands. These take a list of coordinates (x for dates, y for *thousands* of crowns by default). The data is input as follows:

```
\plannedexpenditures{
    (2011-03-01, 10)
    (2011-04-01, 20)
    (2011-05-01, 30)
    (2011-06-01, 40)
    (2011-07-01, 50)
    (2011-08-01, 70)
    (2011-09-01, 75)
    (2011-10-01, 80) }
\accumulatedexpenditures{
    (2011-03-01, 8)
    (2011-04-01, 13)
    (2011-05-01, 29)
    (2011-06-01, 44)
    (2011-07-01, 58) }
```

There is nothing wrong with putting the data points on the same line inside the braces, though I prefer them stacked so I can look them up more easily.

If you need to report your budget progress in another currency, you can use the `\currency` command; typically, you will type `\currency{€}`.

4 Plan for the next period

Please report any errors, improvements or suggestions either to me directly, on Yammer or on Jira.
