This class is very similar to `sintefreport`. The simplest test report you can write is:

```
\documentclass{sinteftestreport}
\title{My Report}
\begin{document}
\frontmatter
Hello world!
\backmatter
\end{document}
```

Use `\frontmatter` to set up the front page, history page and table of contents, and `\backmatter` to set up the back cover.

Fields can be set with several commands. All relevant fields default to a “Set with `\command`” description, so, to know which command to use to set a certain field, just compile a the empty file and look at the resulting PDF.

This class inherits from `sintefdoc`, so everything mentioned in that class’ documentation is valid here as well.

In particular, this class passes the `report` option to `sintefdoc`. If you prefer the old style inherited from `article`, or want to compile some old reports, you can predictably pass the `article` class option.
