## Theorem (Pythagoras)

*The square of the hypotenuse of a **right** triangle is equal to the sum of the squares on the other two sides:*

$$a^2 + b^2 = c^2.$$

## Proof.

Straightforward.

# Environments

## Definition

A **prime number** (or a prime) is a natural number which has exactly two distinct natural number divisors: 1 and itself.

## Example

The first five prime numbers are 2, 3, 5, 7, and 11.

## Alert block

Note that 1 is not a prime number.
